

Loopback Interfaces

Windows

- Go to *Control Panel*→*Device Manager*→*Action*→*Add Legacy Hardware*.
- Click on *Next*.
- Select *Install the hardware that I manually select from a list (Advanced)* and click on *Next*.
- Select *Network Adapters* from the list of *Common hardware types* and click on *Next*.
- Select *Microsoft* from the list of manufacturers and select a *Loopback adapter* (KM-TEST in Windows 8) and install the same.
- Go to *Network and Sharing Center* to set properties like IP Address and Netmask.

Linux

- Run the following commands from console.

```
cd /etc/init.d
cp /usr/tomcat/webapps/da/WEB-INF/loopback .
chmod u+x loopback
insserv loopback
/etc/init.d/loopback start
```

- Edit the file *loopback* to set properties.
