

# Installing the New User Interface

As there were no major complaints against the new user interface, we decided to make the new user interface as the standard one after upgrade to 5.6. The older user interface will be referred to as the Legacy UI.

## Upgrading to 5.6

1. Upgrade the installation downloading and extracting **2-html.zip** and **3-WEB-INF.zip** from the repository
2. Restart Tomcat and **Upgrade All Tables** using initdb.

## Activating the New UI

1. Log In and go to System Administration→Portals→Skins tab:  
Select **ERP** skin, change the followings and Update
  1. Change Login Process to **caerp**
  2. Activate **Show Menus on Page?**
2. Totally log out, go back to directory and login back

## Retaining the Legacy UI

1. Log In and go to System Administration→Portals
  1. Sites tab: Select **ERP** site - change the Home page to **cahome\_legacy** and Update
  2. Skins tab: Select **ERP** skin - change the followings and Update
    1. Change Template to **html/defaults/ERP\_legacy.html**
    2. Change Stylesheet to **html/defaults/ERP\_legacy.css**
    3. Deactivate **Show Menus on Page?**, if it's Activated
2. Totally log out, go back to directory and login back
