

PostgreSQL - Dumping Data

Windows

```
cd "\Program Files\PostgreSQL\9.3\bin"  
pg_dumpall -Upostgres > data.bu
```

Linux

```
su - postgres  
pg_dumpall > data.bu  
exit
```

PostgreSQL - Restoring Data

Since you are restoring the whole database you will need to delete the database completely. So please remember to do a back up before you do so. Also, you must stop tomcat.

Windows

```
cd "\Program Files\PostgreSQL\9.3\bin"  
psql -Upostgres  
drop database da;  
\q  
psql -Upostgres < data.bu
```

Linux

```
su - postgres  
psql  
drop database da;  
\q  
psql < data.bu  
exit
```
