

Report Menus

Menus in general have 2 formats for defining actions.

Evaluated String

In this format, the entire string is evaluated before action is taken. It usually consists of an expression, usually starting with **#classpath+ ...**, as shown below:

```
Inventory Ledger by Item Group with Serial Number
|#classpath+"/"+#servlet+"?page=*crystal imledwbin_dim_group_sl(~
    p ~
        xgitem caption(From Item Group) default(#sql("select
min(xcode) from xcodes where xtype='Item Group' ")),~
        xgitem caption(To Item Group) default(#sql("select
max(xcode) from xcodes where xtype='Item Group' ")),~
        xitem caption(From Item) picklist(list xitem_si) display(text)
default(#sql("select min(xitem) from caitem ")),~
        xitem caption(To Item) picklist(list xitem_si)
display(text) default(#sql("select max(xitem) from caitem ")),~
        xwh caption(From Warehouse) default("0-Consignments-
0")),~
        xwh caption(To Warehouse) default(#sql("select
max(xwh) from caitemextwh ")),~
        xloc caption(From Bin) picklist(select xloc from imtrn)
default("")),~
        xloc caption(To Bin) picklist(select xloc from imtrn)
default(#sql("select max(xloc) from imtrn ")),~
        xdate caption(From Date),~
        xdate caption(To Date),xtypestk attrib(hide)~
    )"
```

In this format, literal quotes " need to be replaced by double quotes "", as in

```
default(#sql("select max(xwh) from caitemextwh "))
```

Literal String

In this format, the entire string is used as it is for action. It usually starts with **page= ...**, as shown below:

```
Transaction Listing by Supplier |page=*crystal imtrnlistsup(~
    p ~
        xdoctype caption(Document Type)
picklist(#text(imdoctype)) display(combo) default("Transfer Order"),~
```

```
xsup caption(From Supplier) picklist(select xsup
from casup) display(combo) default(#sql("select min(xsup) from casup"),~
xsup caption(To Supplier) picklist(select xsup from
casup) display(combo) default(#sql("select max(xsup) from casup "),~
xdate caption(From Date),xdate caption(To Date),~
xtrnnum caption(From Trn#) default(""),xtrnnum
caption(To Trn#) default("z"),~
xitem caption(From Item) default(""),xitem
caption(To Item) default("z") ~
)
```

In this format, literal quotes " need **NOT** be replaced by double quotes "", as in

```
default("Transfer Order")
```

DO NOT, therefore, replace quotes(") with double-quotes("") in literally formatted action specifications.
