Modules

- This is the module listing of the business.
- Checked Boxes: This are the modules that will appear in our system homepage.

<input checked="" type="checkbox"/>	System Administration	<input type="checkbox"/>	Portal Administration You need to provide selective role-based online access to your Customers, Dealers, Franchisee, Suppliers, Auditors, Employees, Associates, etc.
<input checked="" type="checkbox"/>	Cross Application This is a mandatory module that provides the general infrastructure for all other modules. It covers general setup, system security, maintenance of essential master data for customers, suppliers and products.	<input type="checkbox"/>	Messaging This is a module that provides the general infrastructure for messaging. It facilitates creation and management of messages and addressees' responses to the same.
<input checked="" type="checkbox"/>	General Ledger You want to ensure that all your transactions from various modules to be reflected in your accounts. You want to maintain the books and generate financial statements.	<input type="checkbox"/>	Cash Management You need to manage your cash by planning for receipts and payments and monitoring activities that have an impact on cash flow.
<input checked="" type="checkbox"/>	Sub Ledgers You need to keep track of your receivables and payables on an item by item basis. You also need to know what items were cleared by payment, receipts or adjustments. May be you also want to keep separate ledgers for your discounted bills, post-dated cheques, etc.	<input checked="" type="checkbox"/>	Order Processing You need to process and fulfil customer orders, take care of back orders and bill the customers for services rendered or products supplied.
<input checked="" type="checkbox"/>	Purchase Order & Receiving You need to convert requisitions from sales, factory or other departments into purchase orders on your suppliers, monitor deliveries, inspect and record goods receipts and alert beneficiaries informed of the status of your purchase orders.	<input checked="" type="checkbox"/>	Inventory Management You want to keep track of your inventory by unit as well as by cost. You are keen to monitor your supply commitments and take action to meet those commitments.
<input type="checkbox"/>	Service Order You charge customers for the services you perform for them. Typically, you will charge by hours or by a pre-fixed amount. You will also want to be re-imbursed for disbursements.	<input type="checkbox"/>	Engineering Sales You need to quote for engineering projects based on rough cut BOMs or experience, estimate costs and profits, monitor status of quotations, revise quotations, convert quotations into orders, track progress payment schedules based on project milestones, process and fulfil customer orders, take care of back orders and bill the customers for services rendered or products supplied.
<input checked="" type="checkbox"/>	Space Reservation You want to rent space like rooms, billboards, hospital beds, equipment and integrate all the back end activities resulting from the same.	<input type="checkbox"/>	Bill of Materials You need to maintain the component structure of your assembled products. You may also group your products into generic sub-assemblies, which in turn may be combined into finished products. You may also want to maintain the variations caused by options selected by your customers.
<input type="checkbox"/>	Manufacturing Order You need to convert orders for manufactured goods from sales or other departments into manufacturing orders on your plants, issue raw materials and components, inspect and record goods receipts and alert beneficiaries informed of the status of your production.	<input checked="" type="checkbox"/>	Customer Support You need to keep track of your support commitments to your customers. You also need to record customer feedbacks and complaints, and refer them to appropriate persons in your support group. You also need to handle warranty commitments like replacements and free on-site maintenance.
<input type="checkbox"/>	Bug Tracking You need to keep track and manage bugs discovered by users in your products and refer them to the appropriate team of developers. This module allows you to pro-actively handle all reported problems in your products.	<input type="checkbox"/>	Web Store-B2C You want to publish your products and services on the Web and allow your customers to buy and pay for them.
<input type="checkbox"/>	Configurator You want to allow your customers and employees to configure end products based on predefined rules and integrate the same to your sales and fulfillment process.	<input type="checkbox"/>	Exchange You want to create markets for various categories of products and services. You would like to create unique forms with ad hoc fields and rules for each category for your members to interact meaningfully. You also want to have the ability to bill sellers and/or buyers based on pre-defined business models.
<input type="checkbox"/>	E-Procurement You want to publish your requisitions for products and services on the Web and allow your suppliers to quote for, receive orders and manage deliveries.	<input type="checkbox"/>	Navigator You need to integrate your static and dynamic contents in your web site and provide a consistent look and feel across diverse pages. You would also like to selectively publish different contents for different audiences.
<input type="checkbox"/>	Salesforce Automation You want to combine a robust sales database with the knowledge of intricate relationships between organizations, people, events and activities in order to exploit market opportunities.	<input checked="" type="checkbox"/>	Event Management You want to manage events like seminars, exhibitions, workshops, classes and allow registration to the events by internal agents or external participants.
<input type="checkbox"/>	Master Scheduling You need to manage planned manufacturing schedules for manufactured items based on expected sales and not based on actual orders received. The information in this module is used by Materials Requirement Planning as well as Production Scheduling and Capacity Planning modules.	<input type="checkbox"/>	Materials Requirement Planning You need to ascertain your needs for raw materials and components based on your manufacturing orders or planned production derived from your master manufacturing schedules. You also need to create planned requisitions, purchase orders and manufacturing orders well in advance to fulfill these requirements.
<input type="checkbox"/>	Work Center and Routing You need to maintain up to date information about your production infrastructure and estimated costs as well standard production routes for your manufactured items.	<input type="checkbox"/>	Academic Management You want to combine a robust student database with the knowledge of intricate relationships between parents, teachers, events and activities in order to offer the very best.
<input type="checkbox"/>	Capacity Planning You need to assess your production capacities vis-a-vis your production plans to identify bottlenecks and excess capacities, so that corrective actions may be taken to correct imbalances in your production infrastructure.	<input type="checkbox"/>	Production Scheduling You need to manage planned production of items so that resources are optimally allocated based on machine capacities and production routing. You also need to keep track of status of jobs, costs incurred, and work center loading.
<input checked="" type="checkbox"/>	Sales Analysis You need to analyze your sales, costs and margins by various parameters related to your products, customers, markets, territories, etc.	<input checked="" type="checkbox"/>	Trip Routing You want to optimize your physical deliveries, track schedules and collect cash on delivery. You would also like bill customers as well as your principals and manage costs and payables to your service providers.
<input type="checkbox"/>	Healthcare You want to manage your healthcare practice, patient records, charges, payments, insurance and collections. You also need to manage physicians' appointments with your patient, including self internet support site that could be accessed by your patients and providers.	<input type="checkbox"/>	Vessel Performance Vessel Performance Monitoring System.
<input type="checkbox"/>	Crew Management Complete History & personal information of Ship Crew.	<input checked="" type="checkbox"/>	Warehousing You want to receive, store, ship, manage and track your and your customers' materials in bulk or loose state in your warehouses. You need to implement appropriate picking and cartoning strategies for fulfilling shipping orders. You also need to bill your customers for the warehousing services you provide
<input type="checkbox"/>	Warranty/Maintenance You need to negotiate support contracts with your customers, including free warranty and paid maintenance contracts. You also need to generate job requisitions based on your commitments and customers needs, assign appropriate resources, allocate spares and consumables, and monitor Fulfillment. You also need to bill the customers where your services and materials exceed commitments.	<input type="checkbox"/>	Generic Self Service Portal You need to provide selective role-based online access to your Customers, Suppliers, Auditors, Employees, Associates, etc.
<input type="checkbox"/>	E-Permits You need to process online applications for permits and allow access by vendors and buyers to the permit databases restricted to their respective segments.	<input checked="" type="checkbox"/>	Human Resources You want to manage information relating to your human resources, your managers, employees, contractors and temp workers. You will also want to track their costs, revenue, attendance, training and placement.

The Business

Modules

Models

How does your business make money?

Please tick one or more areas that fits your business model.
You can always add or remove these models as and when you like.

☐

Generic

This model comprises the minimum logic and infrastructure required to run any business involving billing and accounting. All other models adds on to this basic model. It is strongly recommended that you include this model.

☐

Web-Retailing

You sell products and services through your web site with online payment processing.

☒

Projects

You work on projects. You buy materials for using in the projects. You deliver or drop ship sub-assemblies to customer. You bill customers based on pre-defined project milestones.

☐

Logistics BPO

You take over all the logistics functions from your customers and handle receiving, testing, storage, packing, delivery, billing to and collection from the end consumer on behalf of your customers. You also handle returns and raise credit notes in favour of the end consumer. Your are paid by your customers based on the volume and type of tasks you perform on their behalf. You also expect to be re-imburSED for disbursements.

☒

Services

You charge customers for the services you perform for them. Typically, you will charge by hours or by a pre-fixed amount. You will also want to be re-imburSED for disbursements.

☒

Distribution

You buy and stock items for selling them at a profit.

☒

Assembly

You buy components and assemble them into finished products.
