=== Implementation of Alerts and Automated Tasks ===
Automated tasks and sending notification to associated recipient via E-Mail,SMS or DreamApps message is now easier and smarter.
Accessible through Home» System Administration» Automation and Resources.

Alerts
Alert can be generated when user performs any action say, clicking Add/Update or Confirm on screen. And associated recipients are notified via E-Mail,SMS or DreamApps message as preferred in the Alert Setup.
To setup an alert we need to know:

1. Site Name:Site(s) under which the notification will be applicable.
2. Page Name. (e.g.:opord)
3. Command Button and Tab name, Separated by "|". (e.g.: Add|Details)
