Why was my PO not created automatically?

For POs[1] to be created automatically from Customer Order, you need to ensure.

- Available stock of the item in the warehouse is not enough,
- The item must **not** be of type **Manufactured Item**,[2]
- The item must have a designated supplier specified in the item master, and
- The back order type for the order line must be **Order Now**.[3]

[1]

Purchase Orders

[2]

If it's of type Manufacturing Order, a Manufacturing Order will be created instead of a PO.

[3]

This is defaulted from Customer Master.
