New Pricing Options

Special/Promotional Pricing

Special/Promotional Pricing is used for specific promotions. To implement:

- Define Special Prices with a Price Code and specific Effective and Expiration Dates by clicking on Selling Prices button on Item Master and then clicking on the Special Price Table link.
- While order entry, when applicable, a Price Code field will appear next to the Item Code field. User selects a price code to apply the Special Price referred to by the same.

Dimension-based Pricing

A Dimension-based pricing is implemented by defining prices for each option for a dimension applicable to an item. To implement:

- Define option prices in Product Data Management for each dimensions for a Product Data Class.
- Prices can be generic, Customer-specific or by Customer Price Group.
- Use Options tab for generic default prices for options.
- Use Options by Customer tab for Customer-specific and Customer Price Group prices.
- While order entry, after dimensions are selected and processed, a table showing price breakdown by options will appear on the order detail screen.
