

Singapore GST

The features required by Inland Revenue Authority of Singapore (IRAS) to implement Goods and Services Tax (GST) related components are installed by simply inserting the word **sg-iras** in the comma-separated list of **Custom Features** in the target business. To do this, go to

System Administration » Business, Modules and Models

from the **Home** page, insert **sg-iras** in **Custom Features** and click on **Update**.

The screenshot shows the DreamApps ERP System Administration interface. The top navigation bar includes links for Home, Business, Modules and Models, Portals, Users and Security, Automation and Resources, and Data Tools. The main content area is titled 'The Business' and shows 'Business Id: 807'. Below this, there are buttons for 'New Business' and 'Copy'. A message states: 'If you are creating a new business, change the Short Name and the Organization, and then click on New Business. Log Out and then Log In to the new business.' The 'Custom Features' field is highlighted with a red box and a callout indicating it must be separated by commas. The 'Update' button is also highlighted. The form includes fields for Short Name, Address 1, City, Zip/Postal Code, Background Image URL, Command, Tax Number, Address 2, Email, Title Image URL, Date Format, Text Capitalization, Organization, Contact Name, State/Province, Country, Date Separator, Base Currency, Single Currency Only, Business Regn Number, Activate Error Logging, Activate Transaction Logging, Self-customization, and Activate SMS? The 'Custom Features' field contains 'sg-iras, demopro' and a callout indicates it must be separated by commas. The 'Update' button is highlighted. The footer shows 'POWERED BY DreamApps' and '© 2001-2012, DreamApps, Inc.'
